PROJECT

Thyroid Cancer Risk Prediction Web Application

Developed a full-stack web application to predict thyroid cancer risk using a machine learning model. Built an interactive frontend with HTML, CSS, and JavaScript, featuring a responsive card-based UI for risk status, probability, and recommendations. Implemented a Flask backend with a RESTful API, integrating a scikit-learn model and MySQL database for data storage.

https://l1nq.com/gIt2H

Sylhet Medical Information Hub

Built a Laravel and PHP-based web platform to display Sylhet hospital details, including doctor lists, schedules, medical test fees, and service prices. Created a user-friendly frontend with HTML, CSS, and JavaScript, and a MySQL-backed Laravel backend with secure APIs for efficient data access.

Pharmacy Management Systems

The Pharmacy Management is a project developed to enhance the efficiency, accuracy, and security of pharmacy operations. It features user roles for administrators and chemists, facilitating tasks like adding and managing medicines, generating bills, and maintaining user profiles using Java and Swing components.
